

Sustainable Projects

Sustainable

Projects is a national company with the head office in Cape Town, South Africa, and was established to provide dedicated services for the sustainable and renewable energy industries. Sustainable Projects draws on nearly 20 years experience in design, engineering, fabrication, construction and installation in order to provide optimised solutions for renewable energy developments.

Sustainable Projects has emerged as a leader in the field of sustainable progress by bringing practical solutions to private and commercial sectors in South Africa.

Many aspects of sustainable development, including energy efficiency, renewable energy, and water conservation need to be addressed on the ground level. Many processes, policies and proposals by government and private entities need to be implemented. From this realization, Sustainable Projects developed its functional toolbox in order to support efficient living.

Sustainable Projects offers complete turnkey services for analyzing projects, assessing feasible areas of intervention, and creating solutions. We provide the optimal solution by using premium products that are best suited to the project.

Our toolbox includes a range of services and products covering the fields of:

Solar

powerWind
powerSolar
thermal heating and coolingWater
recycling and treatmentConsulting
and auditing servicesCarbon
foot printing Sustainable
building

Within these fields we offer feasibility studies, project and system designs, supply of equipment and products, customized solutions, and professional services for the consultation and implementation of the project.
