

Aeromax 900W Wind Turbine

The Lakota Aeromax 900W Wind Turbine The LAKOTA Wind Turbine is a state-of-the-art small wind turbine designed for use in stand-alone or grid-tied applications. Developing electricity from wind, the turbine features remarkably quiet AEROMAG™ Stealth-Acoustic carbon-fibre blades. Lowest noise emission high performance home power wind turbine available.

When it comes to “quiet” smooth running turbine operations in residential communities, AEROMAG™ Stealth-Acoustic is the right choice for good neighbours!

Number one for safety and structural integrity, AEROMAG™ Stealth Acoustic is the world leader in low rotational inertia high tip speed ratio “home power safe”,, blade technology

WIND TURBINE GENERATOR FEATURES

- • Anodized Aluminum body with all stainless steel hardware
- • Rare earth Neodymium Iron Boron Permanent Magnets
- • Lowest cost per Watt GUARANTEED
- • High Power Density Generator Technology
- • Rated 900 Watts Power Output at 28.8mph
- • Peak Output Power at 1300 Watts
- • Start-up wind speed at 6 mph
- • 12,24,48 Volt available
- • Lightweight 34 lbs.[17kg]
